

ARUP

Designing a net zero roadmap for healthcare

An overview of the methodology

1st September 2022

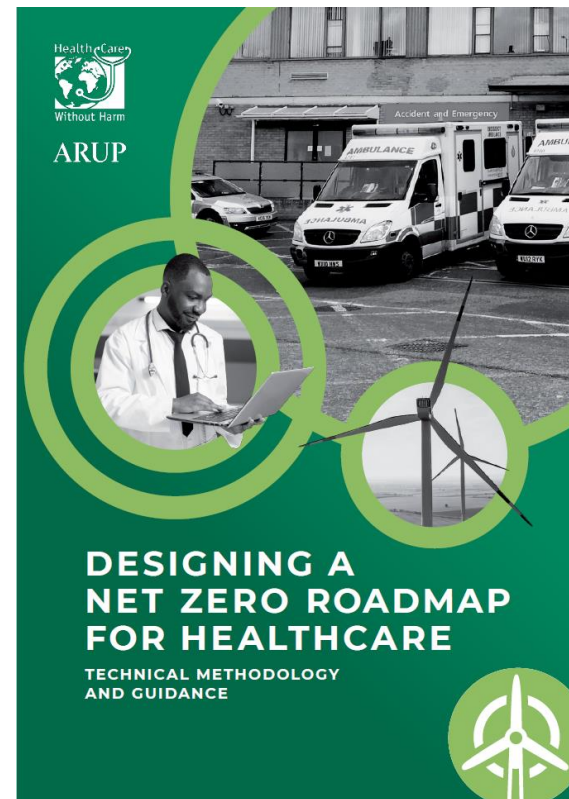

Without Harm

ARUP

1. Overview

- Aim: one-stop shop to start a programme for health system decarbonisation
- Audience: primary – analysts, secondary – policy officials

3. Key takeaways from the Method

Data and model

- Roadmap provides frame of reference for model creation – not an instruction manual
- Output model determined by type of data that is available – bottom-up gathered data vs. top-down high-level reporting
- Modelling should be approached with continual improvement in mind:
